

Oberseminar Geometrie und Topologie

Sommersemester
2019

Dr. Oscar Macia

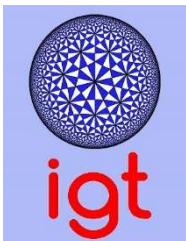

Universidad de Valencia

Geometric c-map on Kähler Lie groups

25. Juli 2019 – 16 Uhr

Seminarraum IGT, Raum 7.530, Pfaffenwaldring 57

Abstract: In a previous work we developed a geometric version of the physicists' c-map using twists by circle bundles. We intend to apply these techniques using group manifolds as domains of the construction, and to study the restrictions in the final geometry which stem from it.
