The Weierstrass (spinor) representation of surfaces in 3- and 4-spaces

**16. Januar 2025– 16:15 Uhr Online-Vortrag
Raum 7.530**

Abstract: We give an introduction to the spinor representation of surfaces in 3- and 4-dimensional Euclidean spaces and, more general, in Lie groups. For that we also discuss the algebro-geometrical structures of Grassmannians of oriented 2-planes in these spaces.
